

Homework3

1. What prompt did you use?

A. SYSTEM_PROMPT_ANSWER = (

```
"You are the scholar in this question, you must only  
answer this question correctly, if uncertain do say 'I  
don't know', try your best to answer the question"
```

```
)
```

2. What prompt did you use?

SYSTEM_PROMPT_ANSWER = (

```
"You are the scholar in this question, you must only  
answer this question correctly, if uncertain do say 'I  
don't know', try your best to answer the question"
```

```
)
```

3. What was the total accuracy for GPT-5-nano?

25.3 %

4. What was the total accuracy qwen/qwen3-8b?

42.8%

5. What are your insights about these results? Share 3 or 4 sentences.

That good prompt can skew the results and make a difference in the accuracy of the results for instance

this was my first prompt

Prompt: Answer the question as concisely as possible in one short phrase. If uncertain, still guess. Do NOT say 'I don't know'

then i updated to the prompt above, I can over 10% of improvements in qwen models.
